TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicant and/or his attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicant nor his attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

ALL REFERENCES CONSIDERED EXCEPT WHERE LINED THROUGH. /P.R./

information cited herein is, or is considered to be, material to patentability as defined in 37

C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08A "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08A, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. Japanese Patent No. 6-043839 published February 18, 1994 discloses: A system which edits a multimedia project on a display picture. The computer display picture presented to a user provides three different views of multimedia information. The first view is a player similar to a virtual video recorder accompanied with a monitor. The second view is a story board which resembling a conventional story board very much. The third view is a strip viewer which presents a view based on the time base of multimedia information to the user. There is an epoch-making screen tool called a 'splinter' on the strip viewer

display part, and it is used to edit the start point and the end point of a displayed multimedia track.

2. Japanese Patent Application No. 2001-309283 published November 2, 2001 discloses:

A supporting method and an apparatus for generating a sequential contents of streaming video image information which enable handling mainly the contents with typical control script such as html(R) and JavaScript(R) having a graphical interface to be operated easily by a common user, and a storage medium to storage the support programs for the same.

In the method of this invention, an image information is read, related auxiliary information with the video image information is read, a variety of reproduction including the special reproduction of the video image information is performed, the related auxiliary information is reproduced, the video image information is mapped to the related auxiliary information for sequential processing, and thereby outputting the script described of the operation processing of the sequential operation between the video image information and the related auxiliary information.

3. Japanese Patent Application No. 2002-354451 published December 6, 2002 discloses:

How to provide a streaming broadcast system in which a state for receiving a video is brought about by simply starting a personal computer, connection can be made automatically with a plurality of video delivery sources by simply selecting a channel without requiring any special operation, and a plurality of streaming broadcasts can be received through a simple arrangement.

A video delivery server arranged to deliver streaming data by a plurality of channels is

prepared at a program source; a video receiving software is set up automatically when a user's receiving terminal is started so that a program table, channels, comments on the program, a using method, advertisements, and the like, can be displayed on the screen of the receiving terminal; and connection can be made automatically with the communication backbone, e.g. the Internet, or a video delivery server by selecting a channel thus receiving a streaming broadcast without requiring any intricate operation.

Respectfully submitted,

Wesley L. Austin
